Reason for Allowance

1. The following is an examiner's statement of reasons for allowance: Examiner takes into consideration of the applicant's argument and the amended claims such as claim 11 having an assembly platform separate from the molding die. The prior art of record fails to teach the claimed invention of an injection molding die and assembly platform, transverse slide, first and second mold ejectors, and a controller that operates with having the platform moving in between the mold halves and operating according to the controller operation. The prior art of record also fails to teach an injection molding die and assembly platform that operates with the capability of the insertion and plugging-in of the molded parts in the assembly holders, and distinguishes from Nishida and Kamiguchi by the separate assembly platform that would move to and away from the molding die.

Other reference of interest, Takemoto 6981860, similarly fails to teach a separate assembly platform, and Bright 5855932 fails to teach an assembly platform with the capability of insertion and plugging-in of the molded apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
